

# Rounding in a Row

You will need two players. Take it in turns to take a 3-digit number card from a pile of face-down cards. Round the number to the nearest 100. If the rounded number is on your number board, you can place a counter over it. The first person to get three counters in a row wins!

100	900	300	100	400
800	400	700	500	200
600	100	800	100	500
200	900	600	700	300
