

**Have a go to see how far the planets are
from each other!**

**Make sure that you are in an area where
you can take lots of steps.**

Put a marker where the sun is, then take your steps.

Mercury = 1 step from sun

Venus = 2 steps from sun

Earth = 2.5 steps from sun

Mars = 4 steps from sun

Asteroid belt = 8 steps from sun

Jupiter = 13 steps from sun

Saturn = 24 steps from sun

Uranus = 49 steps from sun

Neptune = 76 steps from sun

Kuiper belt = 100 steps from sun
