

Comic Relief Challenge Cards Answers

1. Accept approximate guesses between 13-20 red noses.
2. No, Lenny is wrong. If 10 red noses are in every box, then there will be 50 in 5 boxes, not 55.
3. $£20 - £9 = £11$ left
4. $£27 + £32 = £59$ raised altogether
5. There are 6 lots of 15 minutes in $1\frac{1}{2}$ hours so Cuckoo changes her hat 6 times.
6. $40 \div 5 = 8$ in every box
7. $6 \times 50p = £3$.
8. No, Tim is not correct. $60 + 60 = 120$, so a full box will weigh 120g.
9. $2 \times £10 = £20$. $£20 \times 5$ hours = $£100$.
10. $£2 \times 20 = £40$. $£5 \times 2 = £10$. Ahmed raises the most ($£40$),
11. $7 \text{ p.m.} - 9:30 \text{ p.m.} = 2\frac{1}{2}$ hours). $10 \text{ p.m.} - 1 \text{ a.m.} = 3$ hours. $2\frac{1}{2}$ hours + 3 hours = $5\frac{1}{2}$ hours in total.
