

Handling Data

1 Here is a block graph to show the colour of cars in a car park. Make each block on the graph the same colour as the cars.

2 Use the graph in Question 1 to find the answers to the questions.

a How many red cars were there?

b How many blue cars and yellow cars altogether?

c How many more green cars than blue cars?

3 Put the data shown on the graph in Question 1 into this table. One column has been done for you.

Red	Blue	Green	Yellow
	3
