

## Time to go to bed?

Jack goes to bed at half past 8. He was sure that he went to bed before all his classmates. His mum said that he was wrong. So, Jack did a survey of bedtimes of other children in his class. He showed the results in a pictogram.

### Our bed times

One smiley face for each friend

Children in Jack's class

1. How many children go to bed at half past 7?
2. How many children go to bed at the same time as Jack?
3. How many children go to bed after half past 8?
4. Was Jack right? Does he go to bed before all his classmates?
