

Name: _____ Class: _____

Match the fraction calculation to the correct answer.

1 $\frac{3}{8} + \frac{2}{8} = \frac{5}{8}$

2 $\frac{4}{5} - \frac{5}{10} = \frac{3}{10}$

3 $\frac{2}{10} + \frac{5}{10} = \frac{7}{10}$

4 $\frac{2}{3} + \frac{1}{6} = \frac{5}{6}$

5 $\frac{1}{4} + \frac{2}{4} = \frac{3}{4}$

6 $\frac{3}{8} - \frac{1}{4} = \frac{1}{8}$

7 $\frac{3}{12} + \frac{4}{12} = \frac{7}{12}$

8 $\frac{1}{5} + \frac{2}{5} = \frac{3}{5}$

9 $\frac{7}{8} - \frac{1}{2} = \frac{3}{8}$

10 $\frac{1}{2} - \frac{3}{12} = \frac{3}{12}$

$$\frac{3}{10}$$

$$\frac{3}{8}$$

$$\frac{3}{5}$$

$$\frac{7}{12}$$

$$\frac{3}{12}$$

$$\frac{5}{8}$$

$$\frac{5}{6}$$

$$\frac{1}{8}$$

$$\frac{3}{4}$$

$$\frac{7}{10}$$

Write one fraction addition problem and one fraction subtraction problem that each have an answer of $\frac{5}{12}$.

11 _____ + _____ = $\frac{5}{12}$

Accept any given answers that equal $\frac{5}{12}$

Examples: $\frac{3}{12} + \frac{1}{6}$, $\frac{11}{12} - \frac{1}{2}$
