

Giant's Causeway Sorting Cards

Cut out the cards.

In your group, discuss each card and sort it into 'True', 'False' or 'Opinion'.

The Giant's Causeway is in County Antrim.	Fairies formed the Giant's Causeway using pickaxes and shovels.	The columns that make up the Causeway are basalt.
The Giant's Causeway is the best tourist attraction in Northern Ireland.	Many of the columns are hexagonal.	The Irish myth 'The Children of Lir' explains how the Giant's Causeway was formed.
Some of the columns have twenty sides.	Many tourists visit the Giant's Causeway each year.	It is best to visit the Giant's Causeway at the weekend.
Tourists are only interested in hearing the scientific explanation of how the Causeway was formed.	Fionn MacCumhaill (Finn McCool) is the greatest figure in Irish mythology.	The Giant's Causeway is a UNESCO World Heritage Site.
About one million stone columns make up the Giant's Causeway.	Scientists believe that volcanic activity in the area led to the formation of the stone pillars.	The Giant's Causeway is fifty miles away from the coastline.
