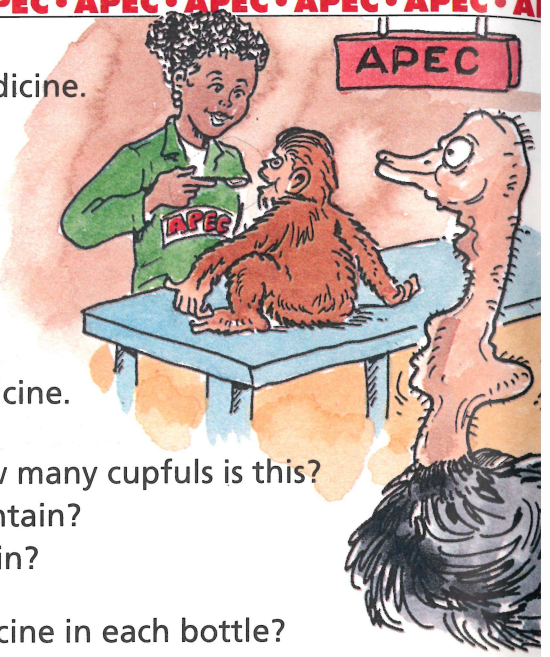
81 Medicine

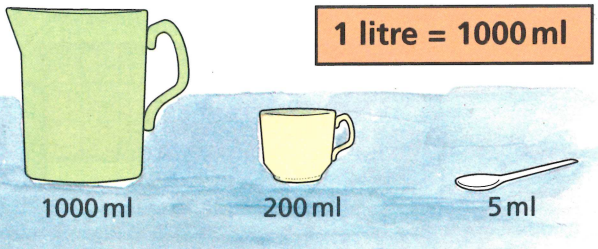
Volume: millilitres

APEC • APEC • APEC • APEC • APEC • APEC • APEC • APEC • APEC • APEC • APEC • A



The jug holds **1 litre** or **1000** millilitres of medicine.

1 litre = 1000 ml



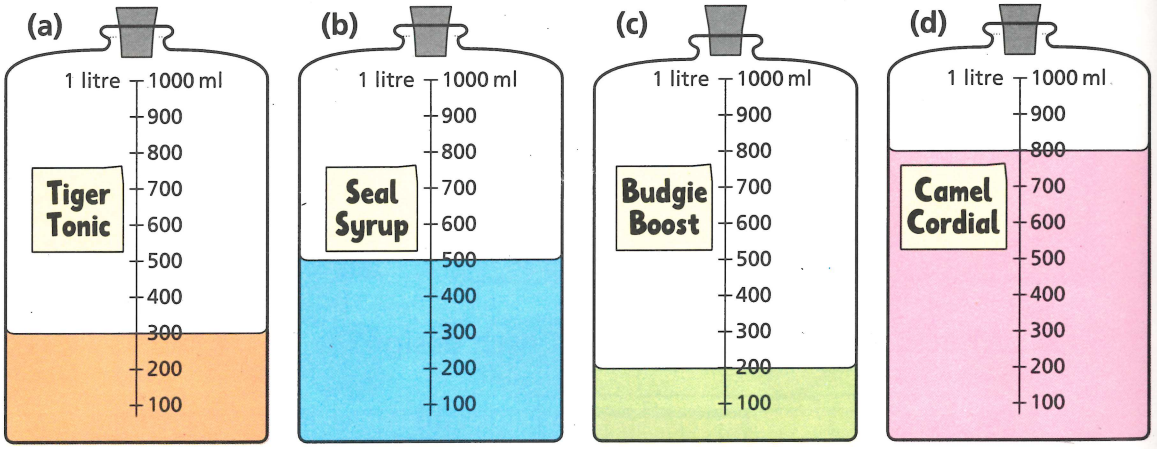
1 (a) Karen gives the monkey 20 ml of medicine. How many spoonfuls is this?

(b) The dose for the ostrich is 600 ml. How many cupfuls is this?

(c) How many spoonfuls does the cup contain?

(d) How many cupfuls does the jug contain?

2 What is the volume, in millilitres, of medicine in each bottle?



3 Which bottle contains (a) about $\frac{1}{2}$ litre (b) less than $\frac{1}{4}$ litre?

4 (a) How many millilitres does each small interval represent?

(b) How many millilitres of liquid are in the jar?

(c) The measuring jars below show the volumes of the four ingredients of *Monkey Mix*. Write a recipe for *Monkey Mix*, giving the volume of each ingredient. What is the total volume?
