

Name _____

Date _____

Bits and pieces

1. Change these improper fractions to mixed numbers – that is, whole numbers and fractions. Shade the diagrams first to help you.

$$\frac{5}{4} = 1 \frac{1}{4}$$

$$\frac{4}{3} = 1 \frac{1}{3}$$

$$\frac{6}{5} = 1 \frac{1}{5}$$

$$\frac{5}{3} = 1 \frac{2}{3}$$

$$\frac{4}{2} = 2$$

$$\frac{6}{3} = 2$$

2. Now change these mixed numbers to improper fractions. Shade the diagrams first to help you.

$$1 \frac{1}{2} = \frac{3}{2}$$

$$1 \frac{1}{4} = \frac{5}{4}$$

$$1 \frac{1}{5} = \frac{6}{5}$$

$$1 \frac{2}{3} = \frac{5}{3}$$

$$1 \frac{3}{4} = \frac{7}{4}$$

$$2 \frac{1}{2} = \frac{5}{2}$$
